Inspiring Future Einsteins

Saturday, March 18

6-8:30pm

Fluor Café

Inspiring Future Einsteins

Join us on March 18 for an evening of fun, inspiration, and The Spirit of Einstein Award at our annual event, *It's Relative!*, a celebration of innovative science education and achievement, formulated by the Roper Mountain Science Center Association.

Guests will once again celebrate one of the world's most renowned scientists, Albert Einstein, in support of the region's foremost Science Center focusing on STEM education for our children. Your support of *It's Relative!* will ensure the continued inspiration and cultivation of the next great inventor, innovator, or problem solver!

The mission of Roper Mountain Science Center (RMSC) is to ignite the natural curiosity of all learners to explore and shape their world. RMSC provides curriculum-based, hands-on, interactive experiences for elementary and middle school students, as well as special "edutainment" for individuals and families through public programming, including Starry Nights in the planetarium and observatory and Second Saturdays. Each year, more than 50,000 students, 6,000 teachers, and 30,000 families and adults benefit from RMSC's exceptional programs.

RMSC is supported by the Roper Mountain Science Center Association, a 501-c-3 nonprofit organization of individuals, families and businesses who assist with fundraising, advocacy and volunteerism. Funds raised by *It's Relative!* will directly support children in STEM programs and activities at RMSC.

Sponsorship Levels

Big Bang

\$7,500

- Two reserved tables for eight
- Facilitated team-building session for your group on our low ropes challenge course
- Twenty customized admission passes to Roper Mountain Science Center public events
